EXPERIENCE

Founding Software Developer – ZipTip

Dec 2025 – Present

Remote / Westminster, MD

- > ADD PYTHON Built and developed lambda functions for user authentication, account creation & management, payment processing, and data retrieval.
- > Created authentication and authorization services for ZipTip and Stripe accounts using Cognito.
- > Integrated RESTful APIs for communication between frontend and backend services using boto3.
- > Built unit & integration tests using pytest, automated AWS SAM deployment for prod and dev environments.

SKILLS

Python: FastAPI, Django, Flask, AWS (Lambda, SAM CLI), boto3, Cognito, JSON

Java: Spring Boot, JPA, Gradle, JUnit

JavaScript/Typescript: Next.js, React, Vite, Vue, Angular

Databases: PostgreSQL, DynamoDB

Tools: Git/GitHub, Docker, Linux, pip, uv (venv), npm, Vim, Tmux

TECHNICAL PROJECTS [GitHub](#)

On The Money – *Java, Spring Boot, JPA, PostgreSQL, Docker; Swift, SwiftUI*

- > Created RESTful API using Spring Boot and JPA to manage financial calculation and transaction data.
- > Implemented PostgreSQL database with JPA for persistent storage of user data, financial calculations, and transaction history.
- > Used JSON to transmit data between Java API and SwiftUI frontend, as well as between API and C++ engine for heavy financial calculations.
- > Developed a SwiftUI frontend for iOS and macOS, allowing users to interact with the API and visualize financial data.
- > Dockerized and deployed the application on a cloud VPS for persistent hosting with Nginx reverse proxy.

QuickQuill – *JavaScript, Vite, ESLint, Prettier; Docker; C++17;*

- > JavaScript frontend built with Vite, ESLint, and Prettier for a responsive and user-friendly interface. (see [QuickQuill](#))
- > Reduced repeated query latency from ~200ms to <0.18ms via in-memory caching in the C++ backend using Crow framework for handling HTTP requests and responses.
- > Implemented a RESTful API to facilitate communication between the C++ Trie and SQLite3 database, and the JavaScript frontend.
- > Created ghost autofill feature in JavaScript that interacts with the C++ Trie reaching sub-XXms auto-complete response times.
- > Automated Catch2 unit test and Docker deployment in a CI/CD pipeline (GitHub Actions).

EDUCATION

University of Maryland, Baltimore County

Aug 2025 – May 2027

Bachelor of Science in Computer Science

Carroll Community College

Associate of Arts in Computer Science, GPA: 3.6 Overall, 4.0 Major

Sept 2023 – May 2025
