EXPERIENCE

Founding Software Developer – ZipTip

Dec 2025 – Present

Remote / Westminster, MD

- > PYTHON: lambda, boto3, Cognito, JSON, Docker, SAM CLI
- > TYPESCRIPT: Angular
- > CI/CD: Github Actions
- > UNIT & INTEGRATION: tests using pytest, automated AWS SAM deployment for prod and dev environments.

SKILLS

Java: Spring Boot, JPA, Gradle, JUnit

JavaScript/Typescript: Angular, React Native, HTML, CSS, Next.js, React, Vue

Python: FastAPI, Django, Flask, AWS (Lambda, SAM CLI), boto3, Cognito, JSON

Databases: PostgreSQL, DynamoDB

Tools: Git/GitHub, Docker, Linux, pip, uv (venv), npm, ESLint, Prettier, Vim, Tmux

TECHNICAL PROJECTS [GitHub](#)

On The Money – *Typescript (React Native); Java (Spring Boot), JPA, PostgreSQL; Docker*

- > Created RESTful API using Spring Boot and JPA to manage financial calculation and transaction data.
- > Implemented PostgreSQL database with JPA for persistent storage of user data, financial calculations, and transaction history.
- > Used JSON to transmit data between Java API and React Native frontend, as well as between API and C++ engine for heavy financial calculations.
- > Developed a React Native frontend for iOS, Dockerized and deployed on a VPS.

QuickQuill – *Typescript (Angular); Java (Spring Boot), JPA, PostgreSQL; Docker; C++17;*

- > Typescript frontend built with Angular for a responsive and user-friendly interface. (see [QuickQuill](#))
- > Reduced repeated query latency from ~200ms to <0.18ms via in-memory caching in the C++ backend using Crow framework for handling HTTP requests and responses.
- > Implemented a RESTful API to facilitate communication between the C++ Trie and SQLite3 database, and the Typescript frontend.
- > Created ghost autofill feature in Typescript that interacts with the C++ Trie reaching sub-XXms auto-complete response times.

EDUCATION

University of Maryland, Baltimore County

Aug 2025 – May 2027

Bachelor of Science in Computer Science

Carroll Community College

Sept 2023 – May 2025

Associate of Arts in Computer Science
